## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-49, drawn to a magnetic levitation apparatus and method, classified in class 310, subclass 90.5.
  - II. Claims 50-58, drawn to a platen structure, classified in class 355, subclass 69.
  - III. Claims 59-65, drawn to a mirror system, classified in class 356, subclass 450.
  - VI. Claims 66-70, drawn to a wafer lift, classified in class 414, subclass 93.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-VI are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the magnetic levitation of group I does not require the subcombinations II-VI to practice the claimed invention of group I which can practice alone without the support of the claimed invention of group II-VI. The subcombinations have separate utility such as the material structure platen can be used for differ actuator to support a movement of platen, the mirror system can be used for detecting or scanning different apparatuses, and the wafer lift assembly differs in application of group I-III above.

Art Unit: 2834

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Jones on 5/16/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
